Summary

Full Stack Software Engineer with over 2 years of experience designing and developing scalable, high performance web applications. Proficient in modern frontend frameworks (Angular, ReactJS) and robust backend architectures (Java/Spring Boot, Node.js). Demonstrated ability to architect API integrations, optimize database performance, and deliver seamless user experiences for enterprise clients.

SKILLS

- **Backend:** Java (Spring Boot), Node.js (Express.js), REST APIs, Microservices, JDBC, JavaMailSender
- **Frontend:** ReactJS, Angular, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Tailwind CSS, Responsive Web Design, Vite
- **Databases & Cloud:** MySQL, PostgreSQL, MongoDB, AWS Basics, Render, Vercel, Docker
- **Tools & Methodologies:** Git, GitHub, Postman, IntelliJ IDEA, Eclipse IDE, VS Code, Agile/Scrum

EXPERIENCE

SAVANTIS SOLUTIONS INDIA PVT LTD | Client: HCL Technologies (Ford Motor Company)

Analyst

May 2025 – Present | Chennai, Tamil Nadu, India

- Architected and developed scalable Java REST APIs for enterprise backend services, improving data processing speed by 35% and supporting seamless data flow across global applications.
- Engineered dynamic, responsive user interfaces using Angular, reducing page load latency by 20% and significantly enhancing the user experience for internal stakeholders.
- Identified and resolved critical performance bottlenecks in legacy Java applications, implementing sustainable code refactoring that decreased production incidents by 40%.
- Collaborated within an Agile framework with cross-functional teams to design, test, and deploy feature enhancements, maintaining 99.9% SLA compliance and earning recognition from Ford leadership.

Scintillate Informatics Private Limited

Front-End Software Engineer

May 2024 - May 2025, Hyderabad, Telangana, India

- Developed and deployed robust web applications for diverse client projects using JavaScript, ReactJS, HTML, and CSS, focusing on modular component architecture.
- Optimized frontend architecture and implemented advanced state management, resulting in a 30% improvement in rendering efficiency and cross-browser compatibility.
- Streamlined asset delivery and DOM structures, increasing Lighthouse performance scores by over 20 points across multiple client deliverables.
- Customized complex CMS solutions by building bespoke UI implementations, ensuring exact alignment with business requirements and UI/UX designs.

INTERNSHIP

APTIVEX Solutions Private Limited

Web Developer Intern

Jan 2024 - May 2024, Hyderabad, Telangana, India (On-site)

- Built and maintained the Altafiber web application utilizing the MERN stack (MongoDB, Express.js, React, Node.js), successfully delivering core features ahead of schedule.

- Engineered reusable React components with custom hooks, reducing code redundancy by 25% and accelerating subsequent feature development.
- Designed and implemented RESTful APIs in Node.js/Express, integrating with MongoDB to support secure and efficient data transactions.
- Participated in rigorous code reviews and utilized Git for version control, ensuring high code quality standards across the development team.

PROJECTS

Enterprise Restaurant Management Platform Enterprise Restaurant Management Platform | ReactJS, Node.js, MySQL

- Engineered a comprehensive full-stack solution to streamline order processing, staff scheduling, and inventory management for large datasets.
- Implemented responsive user interfaces and optimized backend SQL queries, significantly improving overall operational efficiency.

Voice-Based Encryption System Voice-Based Encryption System | Java, JDBC, SQL

- Developed a secure data storage architecture using Java to protect sensitive information deployed on untrusted servers.
- Engineered robust access control and encryption mechanisms to strictly prevent unauthorized data retrieval and ensure compliance.

Secure Intra-Vehicle Communication Secure Intra-Vehicle Communication | Python, Machine Learning

- Designed a vehicle network security system utilizing Python and anomaly detection models to proactively identify potential cyber threats.
- Enhanced in-vehicle communication reliability by predicting and mitigating network vulnerabilities in real time.

Real-Time Gesture Control System Real-Time Gesture Control System | Python, OpenCV, MediaPipe

- Built an intuitive computer vision application to enable touch-free media volume control, enhancing digital accessibility.
- Integrated OpenCV and MediaPipe for accurate, real-time hand gesture recognition and dynamic interface interaction

EDUCATION

MALLA REDDY INSTITUTE OF ENGINEERING AND TECHNOLOGY - HYDERABAD

B.Tech in Computer Science and Engineering | 2023

CERTIFICATIONS

1. Full Stack Java Development – Simplilearn
 2. Front End Development – Simplilearn
 3. Advanced C++ – Simplilearn
 4. Object-Oriented Programming (OOP) in Java – Simplilearn
-

ACCOMPLISHMENTS

- Certificate of Recognition from Ford Motor Company & HCLTech for outstanding contribution to enterprise application support and service excellence.
- Third Place – IDEATHON 2023, Malla Reddy University, for developing an innovative technical solution.
- Performer Award – Smart India Hackathon 2022.
- Successfully delivered production-ready websites across multiple industries as a Front-End Software Engineer.
- Contributing to enterprise-scale applications for Ford Motor Company through HCLTech.
